

Description

This pressure nail with long pin is ideal for fast mounting of components on PCBs, such as VGA and RS-232 connectors. Suitable for borehole Ø3.2. Because the nail is available in different lengths, suitable for many applications. To choose the right type, choose the length that corresponds to the component to be mounted and add the plate thickness. Can be placed with the thumb without tools. Made from strong Nylon 6.6.

Material:
·compression nail: Nylon (PA).
