

Description

Material:
·connecting ring: steel, case-hardened, ground.

Characteristics:
·type 1: centric;
·type 2: floating;
·type 3: sword-shaped;
·type 4: centric, secured against twisting;
·* in the application example represents the: mounting depth of the connecting ring;
·* 1 in the application example represents the: recess head;
·* 2 in the application example represents the: connecting ring;
·* 3 in the application example represents the: connecting element.
