

Description

Developed for securing screws, bolts and nuts. They prevent loose vibrations, rust and electrolytic corrosion through impeccable double sealing and insulation. Sound and vibration dampening and prevent leakage. These locking washers are often equipped with anti-loss lips (AV lip) so that pre-assembly is possible. Handy for difficult to assemble applications.

Material:

·washer: Nylon (PA).

Characteristics:

·a in the table indicates for which size the spring washer is suitable.
