

Description

Material:

- handle:** reinforced polyamide (PA-GF), oils and greases resistant;
- bore:** female smooth hole, with special deformable fixing ribs, obtained by moulding the plastic.

Characteristics:

- surface:** satin;
- colour:** black;
- fixing:** push fit;
- temperature range from a minimum of -30°C to a maximum of 135°C.

Special request:

It is possible to supply the handle with self-fix hole in colours as shown the table, on request and for quantities.
