

Description

Material:

·height adaptor: heat-treated steel, black coated.

Characteristics:

- the height adaptors for compact clamps allow for a clamping height increase;
- continuous covering of clamping height;
- height adaptor allows an exact positioning of compact clamp at designated slot distances;
- height can optionally be expanded;
- * in the technical drawing representing when using more height adaptors the screws ISO 10642 or DIN 7984 have to be replaced by screws extended by the dimension L2;
- x in the table indicates for which system the height adapter is suitable.
