

Description

Material:
·positioning ring: steel, blackened.

Characteristics:
·the positioning ring is an accessory to down-thrust clamps HE26 and HE66;
·after aligning the clamp positioning rings are fitted on the spindle with the effect that repeated clamping is always exactly on the same point ;
·positioning ring is rotating by 360°;
·on down-thrust clamps. after mounting the clamp can swing 110° to the left or right;
·before mounting the positioning ring, pull-off top portion of down-thrust clamp;
·x1 in the table indicates for which down-thrust clamp the positioning ring is suitable.
