

Description

- Material:**
- body: cast iron;
 - clamping jaw: steel, case-hardened.

- Characteristics:**
- due to the big clamping jaw, this clamping element is suitable for lateral clamping of high work pieces;
 - the clamping force acts forwards and downwards;
 - clamping plate is turnable to the ground or ribbed side;
 - x in the table represents the t-slot size (mm);
 - F1(kN) and F2(kN) in the table represents the spring load.
