Requirements

USB-Programming cable

Before starting the installation, connect the USB programming cable to your computer. The cable should not be removed during installation either.

> **i** **INFORMATION**
> Failure to plug in the cable before installation could result an incorrect installation. In this case, please perform a new installation.

Java-Version

Make sure you have the latest Java version on your computer.

> **i** **INFORMATION**
> If you update the Java version later, you will have to reinstall the software!

Installation

Download and run the installation file

- Download the installation file from www.bansbach.de.

  Link for Download S2-2:
  https://www.bansbach.com/index.php/en/products/easye-line/controllers/s2-2

  Link for Download S2-3:
  https://www.bansbach.com/index.php/en/products/easye-line/controllers/s2-3

- Unzip the ZIP file and run the .jar file stored therein by double-clicking.

- Confirm the dialog box to continue.

- After successful installation, the software icon will appear on your desktop.

The manual is subject to technical alterations and printing mistakes.
