

Manual

Configurationtool Software

easyE-line

Requirements

USB-Programming cable

Before starting the installation, connect the USB programming cable to your computer. The cable should not be removed during installation either.

INFORMATION

Failure to plug in the cable before installation could result in an incorrect installation. In this case, please perform a new installation.

Java-Version

Make sure you have the latest Java version on your computer.

INFORMATION

If you update the Java version later, you will have to reinstall the software!

Installation

Download and run the installation file

- Download the installation file from www.bansbach.de.

Link for Download S2-2:

<https://www.bansbach.com/en/contact/downloads/>

- Link for Download S2-3:

<https://www.bansbach.com/en/contact/downloads/>

- Unzip the ZIP file and run the .jar file stored therein by double-clicking.
- Confirm the dialog box to continue.
- After successful installation, the software icon will appear on your desktop.
