

General Statement Regarding PPWR

Regulation (EU) 2025/40 on Packaging and Packaging Waste

Lisse, The Netherlands, August 2026

BIBUS BV hereby confirms that, within the scope of its business activities, it takes into account the applicable obligations arising from Regulation (EU) 2025/40 on packaging and packaging waste ([PPWR](#)).

The packaging used by BIBUS BV for its products is purchased from specialized suppliers. BIBUS BV requests and maintains, where applicable, information and documentation from these suppliers regarding the packaging materials used, their composition, recyclability, conformity and compliance with applicable legal requirements.

In particular, BIBUS BV takes into account the substance requirements applicable to packaging under Article 5 of Regulation (EU) 2025/40. With regard to heavy metals, the applicable requirement under Article 5(4) is that the sum of the concentrations of lead (Pb), cadmium (Cd), mercury (Hg) and hexavalent chromium (Cr(VI)) present in packaging or packaging components shall not exceed 100 mg/kg.

BIBUS BV uses relevant supplier declarations, specifications, test reports and/or other available compliance documentation as supporting information for assessing conformity of the packaging used within the scope of its activities. Where necessary, BIBUS BV may request additional information or documentation from the relevant packaging supplier.

The information and documentation available to BIBUS BV are maintained as part of its compliance records and are used to support the assessment of applicable packaging requirements. Where relevant, BIBUS BV provides its customers with available information concerning the packaging used for its products.

BIBUS BV will review and, where necessary, adapt its procedures and documentation in response to applicable changes to the PPWR or other relevant legislation.

This statement describes the general approach of BIBUS BV with regard to the PPWR and is **not intended to constitute a product-specific EU Declaration of Conformity**. Compliance of specific packaging or packaging components is supported by the relevant supplier information and documentation available to BIBUS BV. Where additional product- or packaging-specific information is required, such information may, where available, be requested from the relevant supplier.

Yours truly,

BIBUS BV
